How does Ecogreen Essential Sanitisers Work?

Ecogreen Alcohol Free Hand Fresh contains Alkyl C12-14 which adheres to the cellular wall of harmful bacteria including E. coli and Staph aureus when the product is applied. The active ingredients in the product dehydrate the bacterial cell structures and deactivates their metabolic function thus killing them.

When a surface is treated with **Ecogreen Alcohol Free Surface Fresh**, the active ingredients within the product dehydrate and destabilise the bacteria cell structures and deactivates their metabolic protein, which prevents the harmful cells from functioning and replicating, thus killing them upon contact.

Embarrassing foot odours is a common problem which is caused by excessive perspiration and the growth of bacteria on feet. **Ecogreen Foot Fresh** unique, proven and tested formulation will significantly reduce the amount of odour causing bacteria located on the feet, socks and in shoes. With a carefully selected blend of essential oils, neutralise and remove odour causing bacteria leaving your feet smelling fresh and clean.

Directions for Use: Shake well Before Use

Alcohol Free Hand Fresh - Apply product to palm of one hand. Rub hands together ensuring the product covers the entire hand and fingers until hands are dry.

Alcohol Free Surface Fresh - Ensure the surface is free from any food residue, paper or excess water. Spray the surface to be treated and wipe with a clean cloth or paper towel.

Foot Fresh - Spray directly onto your feet, sock and shoes and allow to air dry - no wiping or scrubbing required.
