

ALCOHOL FREE HAND SANITISER

Unique Solutions for Everyday Problems.

Hand hygiene has become recognised as the most important way of preventing the spread of germs, bacteria and sickness.

Ecogreen Alcohol Free Hand Sanitiser is a safe, simple and effective way to sanitise your hands without the need for soap or water. It kills 99.999% of harmful bacteria, meeting the Australian TGA standard test for a disinfectant with one application effective for up to 4 hours. Independently tested and proven.

Being alcohol free, it can be used repeatedly without drying the skin and with its natural emollients, provide a moisturising effect, leaving the hands feeling soft and moisturised. It can be used in environments where the use of alcohol is either banned or discouraged including detention centres, religious centres, educational facilities and medical & health facilities.

How does Ecogreen Alcohol Free Hand Sanitiser Work?

Ecogreen Alcohol Free Hand sanitiser contains Alkyl C12-14 which adheres to the cellular wall of any harmful bacteria including E. coli and Staph aureus when the product is applied. The active ingredient in the product dehydrates the bacterial cell structures and deactivates their metabolic function thus killing them.

Directions for Use

Apply one pump application to hands and rub together until dry.

Kill Rate - Staph aureus and E. coli

Independent tests show a 99.999% bacterial kill rate ecoli and s. aureus after application, meeting the Australian TGA standard test for a disinfectant.
